MEUR

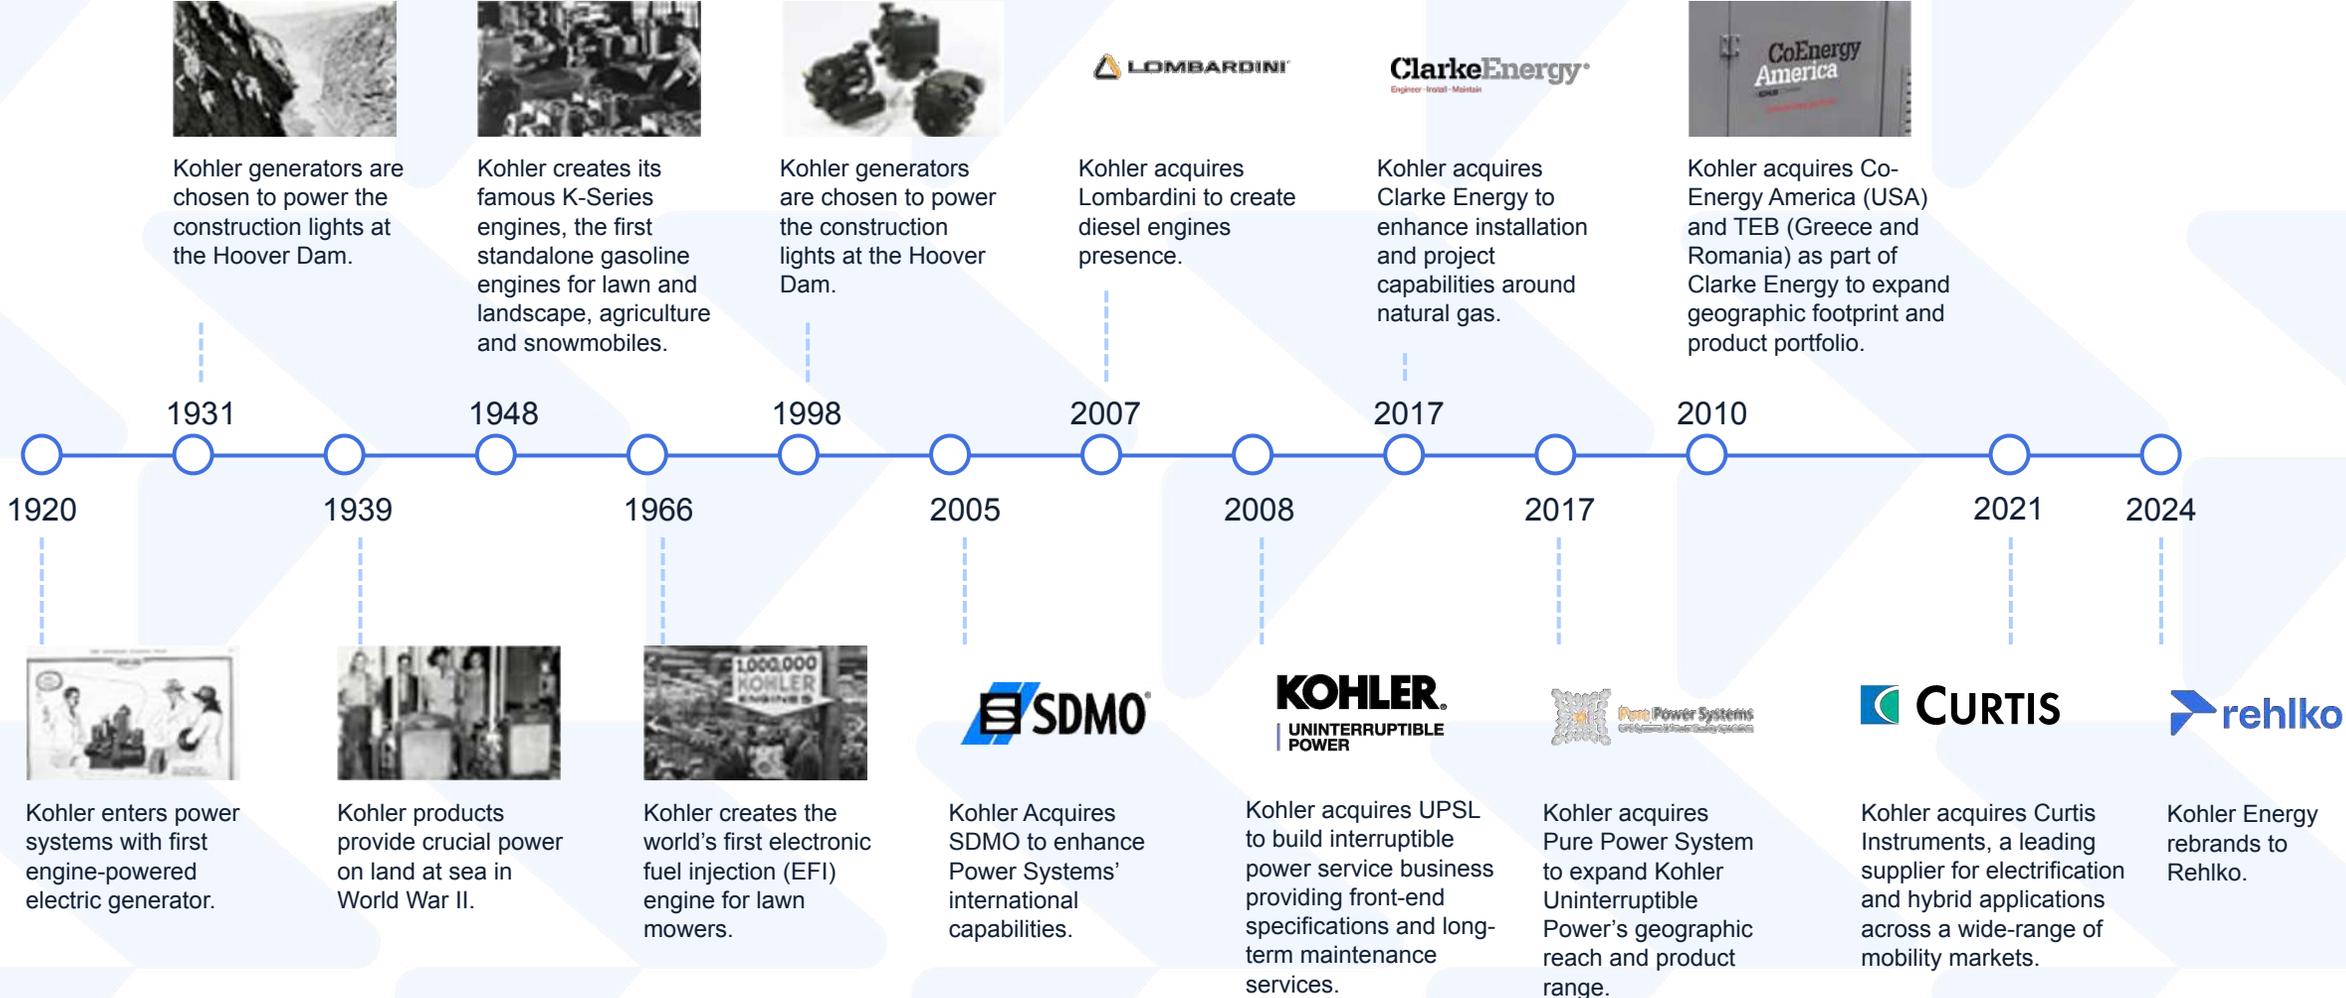

A legacy over *100 years*

Rehko is a leading global energy solutions provider serving the entire energy lifecycle, from industrial energy systems to powertrain technologies and through home energy. Our legacy of innovation helped us become an energy resilience leader, delivering stability and confidence to individuals, businesses and communities.

Now, after more than 100 years as Kohler Energy, with a new name and increased focus, we are giving our customers more control over their energy needs.

Our Journey

Rehiko Large Engines K175

K175 Engine developed and built in exclusive partnership with Liebherr in Colmar, France.

- Engines from 2000 KVA to 4500 KVA (12V, 16V & 20V)
- 20,000 m² – 300 employees
